

corrLengthJumpyCalc

```
graph LR; A[corrLengthJumpyCalc] --> B[varianceCalc]; B --> C[meanCalc];
```

The diagram illustrates a three-step process flow. It begins with a box labeled 'corrLengthJumpyCalc' on the left, which is shaded gray. A dark blue arrow points from this box to a second, white box labeled 'varianceCalc' in the center. Another dark blue arrow points from the 'varianceCalc' box to a third, white box labeled 'meanCalc' on the right. All three boxes are rectangular with black outlines and are arranged horizontally.
